MAYOR'S MESSAGE

Citizens of Winooski:

As I am not a candidate for office at the March elections, and in all probability will not care to run again, I want to take this opportunity of thanking everyone who has helped to make our City a Success.

Our Bonded Debt has been considerably decreased this year, however it now appears that, unless succeeding administrations curtail and keep down expenses, it will be impossible to meet the \$70,000 Refunding Bonds due in 1934.

I would therefore recommend that the City do without an Engineer for the next two or three years, (a saving of \$2500 per year). Our work can easily be done by our present Overseers of the Street and Water Departments.

Also, that the office of City Clerk and Treasurer be put on a straight salary basis.

By making the above savings, I am sure we would be able to put enough additional in the Sinking Fund to meet the \$70,000 issue when due.

There has been a petition presented to the City Council calling for water and sewer mains on the Upper Heights of the City. The next City Council will have to set a date for a Special City Meeting to vote on this question.

On account of the depression here, as elsewhere, it has been necessary to help many of our citizens, therefore the increase in our Charity Department.

The first two months of 1931 has seen expenditure of some \$1500 in this Department and the expense here will be as much, if not more, the coming year.

The Water Department has put in considerable water main on Weaver Street this year, most of which was through more or less solid rock.

I do not think it will be necessary for the City to undertake any very large expenditutes either in the Street or Water Departments in the near future.

Respectfully submitted,

F. EDWARD ALLARD,

Mayor.

REPORT OF THE CHIEF FIRE WARDEN

To the Honorable City Council of the City of Winooski: Gentlemen:—

According to the City Ordinance I have the honor to submit the ninth annual report of the Fire Department of the City of Winooski for the year ending December 31, 1930. The Department consists of twenty four officers and men. Paul Gunther, John Vasseur, Arthur Burnell, Geo. St. Peter, Scott, Welsh, Jos. LeBeau, Leo St. Peter, Leo Contois, Charles Adams, Detmare Villemaire, Henry Merchant, Francis Sourmaile, Paul Martin, Edw. Matte, Aurelin Boucher, Edw. Dorey, Dona Dion, Bert St. Armour, Anthony Tolosky, Ernest Seymour, Gaston Poirrier, Napolion Provist and Leo A. St. Peter.

The Department responded to thirty alarms, five less than for the year of 1929.

The damage done by the fires will not exceed \$6,000 although the amount is some what larger than the past two years. The Munger property on the upper heights was destroyed on January 7 due to lack of water, and the distance to the nearest hydrant. This also will apply to the property owners, in case of fire, on upper Main and Weaver Streets. Statistics show that careless tenants, and dirty stove pipes and chimneys are the cause of innumerable fires through the State, and the same may apply to our City. Vacant lots and back alleys should be kept free from rubbish, and not used for dumping grounds. The City Council have made provisions whereby all garbage and rubbish may be removed by your local garbage collector for a small sum of money. Profane language, and insulting remarks, cast at the firemen from spectators at fires does not put out fires, nor improve the situation but sooner or later will cause trouble for the offenders. Permit me at this time to thank all our loval citizens and the boys of the Department and especially the Mayor and City Council for the cooperation given me during my term of 1930 as Chief.

Respectfully submitted,

Paul H. Gunther, Chief.

ANNUAL REPORT OF THE CHIEF OF POLICE

Winooski, Vt., January 2, 1930.

I hereby submit my Annual report as Chief of Police of the City of Winooski.

During the year ending January 1st, 1931, there were two-hundred sixty-one arrests, for the following causes: Violation of Motor Laws..... 120 55 31 Larceny 9 3 Tramping..... Non-Support........ Search for Liquor..... Fish and Game Laws..... 5 Breach of Probation.... 1 Blanket Act.... 1 Dependent Children..... Adultery..... Possessing Liquor..... Keeping Unlicensed Dog..... 1 Burglary.... 1 Open and Gross Lewdness..... Forgery Uttering Bad Check.....

C. A. BARBER,

Chief of Police.

REPORT OF THE SUPERINTENDENT OF THE WATER DEPARTMENT

To the Honorable City Council of the City of Winooski:—

GENTLEMEN:

The following is the report of the Superintendent of the Water Department for the year ended December 31, 1930.

MAINS

Construction:—A new main was installed on East Canal Street from Barlow St. westerly to the old hotel building. There was installed 177 ft. of 6" C. I. pipe.

Forest Street from River St. to the northerly end has a new 6" C. I. main laid to replace the old 1" line formerly used. We installed 372 ft. of 6" C. I. pipe and one 6" valve.

The old 4" main on Platt Street from Main St. to Barlow St. was replaced by a new 6" main. This required the use of 736 ft. of 6" C. I. pipe and three 6" valves.

The 2" line on Union Street from Main St. to a point just westerly of Weaver St. was replaced with a 6" main. We installed 597 ft. of 6" C. I. main, four 6" valves and one 5" hydrant.

Weaver Street from Union St. to W. Spring St. was completed with 591 ft. of 6" C. I. pipe and three 6" valves.

To extend the recommended work proposed by the

Underwriters the old 6" line on East Allen Street from Barlow St. to East St. was replaced with a new 10" main. There was installed 603 ft. of 10" C. I. pipe, 68 ft. of 6" C. I. pipe, two 10" valves, two 6" valves and one 5" hydrant.

This gives the department a total of 3,144 feet of new pipe installed in one season. The total cost of Union St. and Weaver St. construction which we will consider separately due to large amount of rock excavation necessary was \$4,291.99 for 1188 feet of main or \$3.62 per lineal foot. This cost includes the entire system with services, hydrants, supervision, rental of tools, insurance and overhead.

The total cost of the balance of the work was \$5,385.71 for 1955.8 feet or \$2.75 per lineal foot.

The total cost of the entire construction for the year amounted to \$9,677.70 for 3,143.8 lineal feet or an average of \$3.07 per lineal foot.

This year we have constructed a great deal of new pipe lines so that more men could be employed than otherwise. It will be interesting to note that the greatest amount of new pipes laid out of current revenues in any one season was about 1800 feet while this year we have laid a total of 3,144 feet out of the revenues of the department. It will not be advisable to undertake as large a program every year as we have curtailed on some of the other work of the department.

Hydrants

Construction:—Hydrants have been installed in the following locations this year:—

Street	No.	Size	Location
East Allen St.	1	5''	East St. (replaced)
Union St.	1	5′′	Weaver St.

The total number of hydrants is 87 of which 62 are public and 25 are private.

Maintenance:—The regular inspection has been kept up so that the hydrants work properly at all times. The hydrants were not painted this season except those that

were put in new. All of the hydrants should be painted next season.

GATE VALVES

Construction:—Gate valves have been installed in the following locations.

Street	No.	Size	Location Location
East Allen St.	1	10′′	East side of East St.
East Allen St.	1 .	10′′	West side of East St.
East Allen St.	1	6''	North side of East St.
East Allen St.	1	6''	South side of East St.
Forest St.	. 1	6''	North side of River St.
Platt St.	1	6''	West side of Barlow St.
Platt St.	1	6''	East side of Main St.
Main St.	1 .	6''	North side of Platt St.
Main St.	1	6''	South side of Union St.
Union St.	1	6''	West side of Main St.
Union St.	1	6′′	East side of Weaver St.
Union St.	1	6"	West side of Weaver St.
Weaver St.	. 1	6′′	North side of Union St.
Weaver St.	1.1	6''	South side of Union St.
Weaver St.	1	6''	South side of W. Spring St.
West Spring St.	1	10′′	East side of Weaver St.

Total 16

All of these valves were installed on the newly constructed work.

Maintenance;—All valves have been inspected periodically to keep them in proper working condition.

METERS

Construction:—We have purchased 25 new 5/8" meters and two 2" compound meters this year.

READING:—Meters have been read at six week intervals. The total cost of this work amounted to \$215.52.

Maintenance:—This year we have extended the policy of cleaning some of the older meters and repairing

them so that they would operate efficiently at all times. We have repaired, cleaned and tested a total of 368 meters this year which is greatly in excess of the amount done in previous years. The new meter tester has worked out very satisfactorily and by having this machine installed in the office the clerk has been able to do all of the testing thereby saving a considerable amount of money. There were 21 frozen meters. The total cost of maintenance of meters is \$615.38 for the year. This amount includes the cleaning and repairing which is done by the man that operates the pumps and keeps up the reservoir grounds.

RESERVOIRS AND PUMPING

The reservoirs and reservoir property has been maintained in the usual way this year.

It has been necessary to pump 835 hours and 3,724,500 gallons of water was furnished to Fort Ethan Allen.

GENERAL OPERATION

The Department responded to 21 calls to turn on water and 16 calls to turn off.

SUMMARY OF STATISTICS

For the year ending December 31, 1930
In the form recommended by the
New England Water Works Association
Winooski City Water Works
Winooski, Chittenden County, Vermont.

GENERAL STATISTICS

Population by census of 1930: 5300.

Date of Construction: 1884.

By whom owned: City (purchased July 1, 1905)

Mode of Supply (whether gravity or pumping): Gravity and pumping.

Source of supply: Springs and artesian wells (untreated).

PUMPING STATISTICS

Builders of pumping machinery: Ingersoll-Rand Co. of N. E. Electricity purchased from the Green Mountain Power Corporation.

Total pumpage for the year: 26,024,030 gallons.

Average head against which pump works: Pumps by air lift to reservoir.

STATISTICS OF CONSUMPTION OF WATER

1	Estimated population at date	5300
2	Estimated population on lines of pipes	5000
3	Estimated population supplied	5000
4	Total consumption for year (gals)	97,000,000
5	Average daily consumption (gals)	257,000
6	Gallons per day to each inhabitant	48.4
7	Gallons per day to each consumer	51.4
8	Gallons per day to each tap	298.7
	STATISTICS RELATING TO DISTRIBUTION SY	STEM
1	Kind of pipe: Cast iron, wrought iron.	
^	0: 73 444 4044	

- 2 Sizes: From 4" to 10".
- 3 Extended during the year: 1642 ft.
- 4 Discontinued: 0.
- 5 Total now in use: 10.53 miles (estimated).
- 6 Length of pipe less than 4" diameter: 2.82 miles (estimated).
- 7 Number of hydrants added during the year: 1.
- 8 Number of hydrants (public and private) now in use: 87
- 9 Number of stop gates added during the year: 16.
- 10 Number of stop gates now in use: 143.
- 11 Number of stop gates smaller than 4" added during the year: 0.
- 12 Number of stop gates smaller than 4'': 20.
- 13 Number of blow offs: 1.
- 14 Range of pressure of mains: 15-58 lbs.
- 15 Kind of pipe: wrought iron and steel.
- 16 Sizes: ½" to 6".

- 17 Extended: 242 feet.
- 18 Total now in use: 5.21 miles (estimated).
- 19 Number of service taps added during the year: 5, discontinued: 2.
- 20 Number now in use: 852.
- 21 Average length of service: 32 ft. (estimated).
- 22 Numbers of meters added: 27.
- 23 Number now in use: 840.
- 24 Percentage of services metered: 98.6%
- 25 Number of meters and elevators added: 0, discontinued: 0.
- 26 Number now in use: 0.

Conclusion

As you will note by the Treasurer's report that we have been able to do all of above construction, much of which was ledge excavation and have only a slight overdraft which is caused by the fact that some people were unable to pay their water bills promptly.

We are still following the policy of putting back into the system every cent that comes in as revenue. I believe this should be continued for several years to come.

I sincerely recommend the installation of a high pressure system at the earliest possible date to furnish water to the higher parts of the City. This could be very well done at the present time and some saving would be accomplished as more men could be placed at work thereby saving the funds of the Charity Department. The financing of such a system could be handled by the Department by a small curtailment of our present construction additions to our present system.

I wish to express my appreciation to the Mayor and City Council who have cooperated whole heartedly with me this year to make the above construction possible. I also wish to thank the employees of the Department by whose efforts we have been able to do so much construction for so little money.

This has been the most successful season the Water Department has been through in under my management and it is all due to cooperation of the City Officials and employees which is so essential.

Respectfully submitted,

ARTHUR J. BARRY, Superintendent of the Water Dept.

REPORT OF THE SUPERINTENDENT OF STREETS

To the Honorable City Council of the City of Winooski:

GENTLEMEN:-

The following is the report of the Superintendent of Streets for the year ending December 31, 1930.

From the Treasurer's report it will be noted that the gross cost of the Street Department amounted to \$16,621.74 while the income of the Department was \$10,281.20 leaving a balance of \$6.340.54 which is the net cost to the City for the operation of the Department this year.

When it is considered that we have operated the quarry, and built about one mile of new surface treated streets, maintained our street and sewer systems and repaired the hill on East Allen Street, the year has been very successful for the amount of money expended. It is very difficult to make much of a showing on such a restricted budget but I fell that the work which has been done surely gives the City exceptional value.

I wish to emphasize the fact that if Winooski wished to keep up to the progressiveness of the other cities of the state it will be necessary to procure additional funds for street work. Considerable thought is necessary to provide these funds so that a little work may be done each year. The present budget allows for maintenance only and with that work somewhat restricted. Malletts Bay Ave. and West Allen Street were accepted as a selected highway this year by the State Highway Board.

STREETS

PAVEMENT CONSTRUCTION:—

The hill on East Allen Street just easterly of Barlow Street was the only job done this year. This work consisted of excavating the old road bed to grade and the construction of about 400 sq. yds. of 4" bituminous macadam. The total

cost of this work was \$383.02 or .958c per sq. yd. We received \$153.15 State Aid on this work.

RESURFACING:-

Some sections of Main Street and East Allen Street were scarified, reshaped and rolled. Malletts Bay Avenue was scarified and had stone added for its initial coat of oil. We treated these three streets with two coats of Asphaltic road oil. The State allowed \$1000.00 State Aid on this work.

Spring Street from North Street to Malletts Bay Avenue, Lafountain Street from Leclair Street to Hood Street and St. Peter Street intersection with Malletts Bay Avenue were scarified, had three inches of stone added and were thoroughly rolled. The oil treatment on these streets was two coats of heavy asphaltic road oil. These were treated because of the heavy traffic of the B. R. T. bus system.

These streets added about one mile to our surface treated system.

MAINTENANCE:-

The general maintenance and coldpatching of our streets was done by the gang method of a large truck and a gang of men. Only a small amount of cold patching was done to keep the streets in good condition.

The dirt streets were kept in condition by means of the tractor grader.

CLEANING:-

The streets have only been cleaned twice during the year, in the spring and again in the late fall due to the lack of funds. The main business section, however was flushed at regular intervals. Prior to oiling the motor sweeper of the Burlington Street Department thoroughly cleaned the streets to be oiled.

MUNICIPAL QUARRY

OPERATION:-

The quarry was operated on a part time basis this year

with only a small amount of stone crushed. We crushed a total of 3,931 tons, sold 2,724 tons and have 485 tons on hand.

PLANT AND EQUIPMENT:-

There was no additional equipment purchased at the quarry this year.

SPRINKLING

We used 17,575 gallons of heavy asphaltic road oil for the surface treatment of streets this year. The majority of this material was used for the selected highways and the bus system. We received State Aid of \$1,000.00 on this work. The balance was used on the streets which were previously surface treated and needed an additional treatment. As our dirt streets are getting fewer in number each year and there is not enough of the calcium chloride used to obtain State Aid dust laying money, we used these funds for oiling. The amount was \$500.00.

We used 30 tons of calcium chloride in the dust treatment of our dirt streets during the season.

SEWERS

CONSTRUCTION:--

The only item under this head was the capping of the sewer under the building at the northwest corner of Barlow Street and East Canal Street. This work was necessary because there had never been any constructed sewer at this point. It was a very unsanitary condition to say the least. The department constructed a concrete box sewer 48 feet long 2 feet wide and 3 feet high, inside measurements. The total cost of this job was \$423.57.

There was no other construction of sewers this year due to lack of funds.

MAINTENANCE:-

The sewers have been flushed twice during the year and blocked sewers were unplugged. The total cost of this work amounted to \$128.98.

WELLS AND BASINS

CONSTRUCTION:—

Only one basin was constructed this year. Its location is at the intersection of St. Peter and Hall Streets where the streets were surface treated. No new manholes or lampholes were constructed this season.

MAINTENANCE:—

The catchbasins were cleaned at regular intervals during the year. They were thoroughly cleaned late in the fall in preparation for winter.

SNOW REMOVAL

The only snow removal work of importance was done right after the first of the year. The total cost of this work for the season was \$740.42.

Conclusion

The major items of work this year was the preparation of about one mile of streets for surface treatment, the application of 17,575 gallons of heavy asphaltic road oil, crushing of 3,931 tons of stone.

Whereas the above amount of work isn't large it is well to consider the amount of money expended namely \$6,340.54. All maintenance has been carried on within that amount of money.

There is a dire necessity for additional funds for your street work if any amount of construction is to be done.

I wish to thank the Mayor and City Council for their cooperation and assistance during the year also the employees of the Department for their efforts.

Respectfully submitted,

ARTHUR J. BARRY, Superintendent of Streets.

REPORT OF THE CITY ENGINEER

To the Honorable City Council of the City of Winooski: Gentlemen:—

The following is the report of the City Engineer for the year ended December 31, 1930.

Such lines, grades, designs and estimates as have been called for were given in the proper manner.

The sets of maps which are on file in the office have been kept up to date and all changes properly recorded.

As your engineer was employed on a part time basis, only the engineering work in connection with the construction programs of the Departments under his charge was done. Considerable study and time has been given to the development of a high pressure water system to serve the higher elevations of our City. This work was done to determine the amount of money necessary for the proposed construction.

I wish to take this opportunity to thank the City Officials and others for the cooperation they have given me in carrying out my work.

Respectfully submitted,

ARTHUR J. BARRY, City Engineer.

OVERSEER OF POOR'S REPORT

Winooski, Vt., Jan. 29, 1931

To the Honorable Mayor and Board of Aldermen:—

I submit to you my report beginning with the time I was appointed to office, March 12, to December 31, 1930. The orders were drawn as follows:

Groceries	.\$1915.80
Loan on Lizotte property	
Wood	. 426.30
Milk	
Board	. 755.25
Clothing	. 382.71
Doctor	. 233.25
Medicine	. 99.45
Rent	. 330.50
Funeral Expenses	. 173.00
Ambulance and Hospital	. 15.50
Transportation	. 2.00
Moving	. 23.50
Electric Lights	. 12.48
Miscellaneous	. 18.10
Overseer's salary	. 300.00
	\$4849.56

Note.—\$866.57 of the above amount was for bills incurred by my predecessor.

Since March 12th there were 64 families helped by this department, six families for the whole period and 58 families for only part time.

I wish to thank the Salvation Army of Burlington for the distribution of 40 Christmas baskets to poor families of this city, and also the pupils and teachers of the Essex Center Classical Institute and the people of Essex Center for the distribution of a truck load of vegetables to the poor of this city.

Respectfully submitted,
SERAPHIN NIQUETTE,
Overseer of the Poor.

REPORT OF THE HEALTH OFFICER

To the City Council of Winooski, Vermont:—

The report of the city health officer for the year 1930 is respectfully submitted.

The past year was very satisfactory in regard to the health of the citizens of our city in general. There was no epidemic of any kind during the year which is very unusual.

Following is a list of the contagious diseases contracted and reported during the past year:

Diphtheria 19 cases
Scarlet Fever 14 cases
Whooping Cough 9 cases
Chicken Pox 4 cases

German Measles 2 cases

The water supply is examined at regular intervals and is always found in excellent condition.

The milk supply is furnished by accredited herds. All the dairies have been examined and are found modern and sanitary.

The new system of garbage collection established last spring has made a noticeable difference in the cleanliness of the city. The complaints concerning unsanitary nuisances have been less frequent during the past year.

The lack of space in our schools which has long been a subject of discussion has now been remedied by the building of the Memorial School. It is a fine building, convenient, up to date and sanitary and is a credit to our city and to the building committee.

The Winooski High School pupils now have the advantage of a less congested condition and are well accommodated in regard to sanitation and comfort.

Respectfully submitted,

J. G. THABAULT, M. D. Health Officer.

AUDITOR'S REPORT

January 29, 1931

To His Honor the Mayor and City Council, Winooski, Vermont.

GENTLEMEN:-

We have made an audit of the books and records of the Treasurer of the City of Winooski and of the Water Department from December 31, 1929 to December 31, 1930 and we respectfully submit our report as follows:

TREASURER'S GENERAL ACCOUNT

RECEIPTS

		•

In conclusion we may state that the foregoing report is a correct and accurate check of the city treasurer's books and accounts.

You will notice that the inventory of the City Properties has been given the same valuation as in past reports. We would suggest that at some future date an appraisal company be employed to appraise these properties.

Signed,

GEORGE T. GRAVES, EUGENE H. MANSEAU, JOSEPH J. DUFRESNE,

Auditors.

January 29, 1931.

Winooski, January 26, 1931.

REPORT OF THE LIBRARY TRUSTEES

The close of another year calls for another report, so we respectfully submit our twenty-third annual report as Trustees of the Winooski Free Library.

We have had a good year in our work. Our borrowers have increased. Our circulation for the past year was 23,734; the largest in the life of the Library. The thought uppermost in our minds just at this time is more money for the Library. The kind of service the Library is giving to the people of Winooski well merits more generous support by way of an increased appropriation.

The friends of the Library have been very generous by way of gifts. Mrs. H. G. Hawthorne organized a drive and raised money enough to purchase and present to the Library eight serviceable and very attractive chairs. These chairs have added much to the appearance and comfort of the reading room. Our good and loyal friends, the Ladies of the Progressive Study Club, again saved us from financial difficulties by donating one hundred seventy dollars and eighty cents. In the name of all patrons of our Library, we thank the Ladies of the Study Club for their timely aid.

We have also received substantial gifts of books and magazines from the following: John Bailey, Mrs. Mary R. Bates, Miss Anna Becwar, Leonard Cusson, Raymond Ellas, Mrs. C. W. Hardacre, Frances LaBelle, Cornelius Leary, Mrs. John Lyons, Mrs. S. R. Marcotte, Mrs. W. M. Murphy, Mrs. Everett Mongeon, Miss Hilda Pianfetti, Mrs. Edward Robinson, Armond Wisell and Mrs. U. A. Woodbury. To all these friends we extend our sincere thanks.

Respectfully submitted,

S. R. Marcotte,
Henry Conlin,
Marie Robinson,
Mary C. Allard,
George C. Stackpole,

Winooski, February 4, 1931.

Trustees.

REPORT OF THE WINOOSKI VISITING NURSE, 1930

To the Honorable City Council of the City of Winooski:

The work of the Winooski Visiting Nurse has gone on in the usual manner during the past year, as there is, as a rule, very little variation in the routine work of an organization such as this is once it has become an established factor in the life of the community. There was less illness of a general character this past year, which is always a thing to be thankful for. There was an increase in the Pre-Natal, Maternity and Child Welfare work, in spite of the fact that a great many families had moved away from Winooski. There were 152 births registered this year, an increase of 8 over the year before and of these 103 or 67 2-3% of the total were seen by Miss Dubuc. Practically all of them were seen twice a month until they weighed 15 pounds, after that time they were seen once a month until they reached one year of age. Occassionally a baby needs closer supervision and is seen weekly as long as it is necessary. Of the 18 deaths of infants under one year of age 7 of them had at some time either pre-natally or after birth been under our supervision, showing that the percentage of those under our care is less than among those we do not reach.

The car that was purchased some time ago was put into use during the Fall and was of great help. The upkeep of the car had been a cause of considerable concern as it was felt that we were not justified in using the tax payers money for that purpose. The representatives of the various women's organization met several times during the early Fall to discuss ways and means. The outgrowth of these meetings was the Winooski Visiting Nurse Association, with the following officers: President, Miss Mary Allard; Vice-President, Mrs. H. G. Hawthorne; Secretary, Miss Della Calvert; and Treasurer, Mrs. Gaston Poirier. The purpose of the association is the up-keep of the car, the City Council having assured the responsibility of the debts incurred before the forming of the Association. The Association itself is hoping for, and knows it will have, I believe, the hearty cooperation of the whole community in their undertaking. It was thought advisable not to use the car through the winter but when it is put into use the first of April, we expect that it will be put to good use. The work in Winooski has been so arranged that at that time we hope to be able to widen the scope of our work by beginning, on two or more afternoons a month, some inspection of the schools of Winooski.

More and more are the people of the city beginning to realize that our work is not just a charity but a great help to anyone wanting our help, care or advice. We thank the City Council for all they have done for us in making it possible to do more than the Insurance work sanctioned by the Metropolitan and John Hancock Mutual Life Insurance Companies. The combination makes a good piece of work possible.

HELEN M. ARMSTRONG, R. N. Supervisor.

City of Winooski Vermont

TENTH ANNUAL REPORT of the City Council

For the Year Ending December 31, 1931

winooski F. MATTE. PRINTER 1932

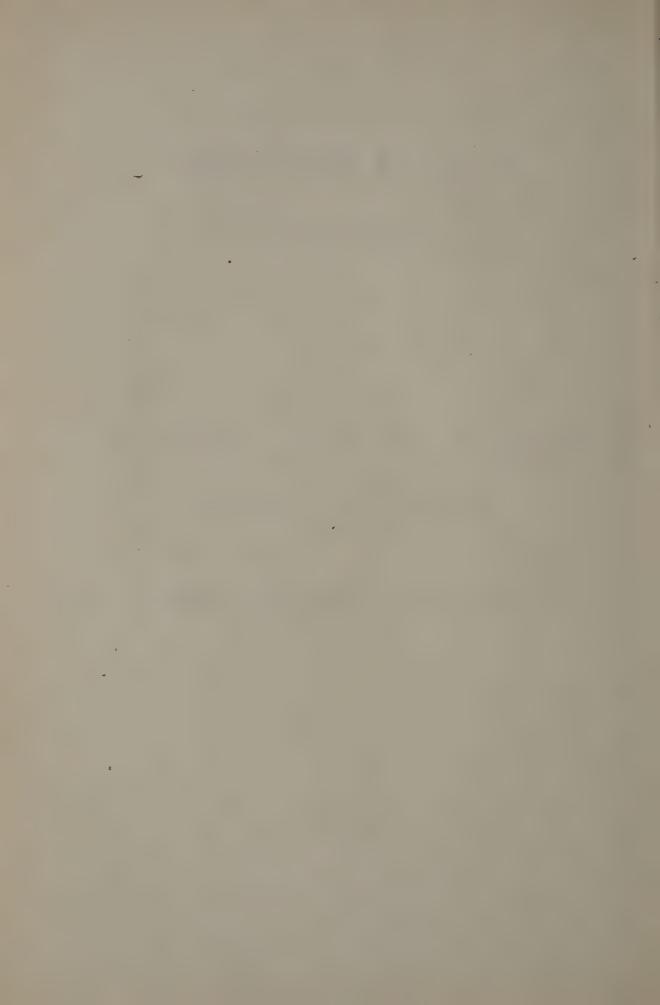

City of Winooski Vermont

TENTH ANNUAL REPORT of the City Council

For the Year Ending December 31, 1931

WINOOSKI F. MATTE. PRINTER 1932

MAYOR'S MESSAGE

February 10, 1932.

FELLOW CITIZENS:

This, the tenth annual report of our City, finds us like many other cities—trying to find our way out. However, it is some satisfaction to be able to break even without any raise in taxation.

The most important task this past year has been our Charity Department. A total of \$9,613.59 was spent this year, \$7,372.34 was spent in 1930, and next year has every indication of being well over \$10,000. The January expense for this Department was over \$1,800. The officers in charge of this Department have worked very hard, put in long hours and are deserving of much credit.

I expect, as you read this, we will have voted favorably on the Water Bond Issue. This will help our Charity Department by giving many people the opportunity to work. The Water Department is in excellent shape and can carry this extra expense without changing the water rates.

Some day in the near future it will be necessary to install sewers where the above water improvements are. I recommend that this be held in abeyance until the summer of 1934 when \$70,000 of Old Village Bonds comes due. From present indications it will be necessary to refund about \$20,000 of these Bonds.

I recommend that the expenses of the different departments for the next year be as small as possible as the revenues will be about the same as they have been this year.

We have in our City a Welfare and Unemployment Committee, Louis Alapa, Chairman; also a Clothing Committee, Charles Barber, Chairman. These committes have worked hard during the stress of the past months. There has been about \$1,000. in cash collected and much clothing, many pairs of shoes and rubbers. Hard times for many are not over and it will take considerable money to assist these people in our midst. I take this opportunity to thank everyone who has in any way assisted in giving help to our more unfortunate citizens. May you be able to continue this help, and may those who have not done so, also come forward with whatever assistance they can give.

Sincerely,

Frank E. Robinson,

Mayor.

CITY OFFICERS, 1931

There has been received from Municipal Court, Fees amounting to \$610.03, and the same has been paid to the City Treasurer.

Respectfully submitted,

C. A. Barber, Chief of Police.

REPORT OF THE CHIEF FIRE WARDEN

To the Honorable City Council of the City of Winooski:

GENTLEMEN:-

According to the City Ordinance I hereby submit the tenth annual report of the Fire Department of the City of Winooski, for the year ending December 31, 1931. The Department consists of twenty one officers and men as following: Paul Gunther, John Vasseur, Arthur Burnell, George St. Peter, Scott Welsh, Joseph LeBeau, Leo St. Peter, Edw. Matte, Charles Adams, Delmore Villemaire, Henry Merchant, Francis Sourmaile, Paul Martin, Aurelin Boucher, Dona Dion, Anthony Tolosky, Gaston Porrier, Napolion Provist, Leo A. St. Peter, Ernest Merchant and Theodore Merchant.

During the year ending December 31, 1931, the Department responded to thirty-one alarms.

Dec.	28	Box 23	Mary Taylor Residence

The damage done by the Fires including property, stock and fixtures will not exceed \$25,000, although the amount is considerable larger then previous years. As a Volunteer Fire Department and the serious conditions of some of the fires when discovered, I consider the loss very small. I sincerely hope some provisions will be made in the near future, where by the Upper Heights, Main and Weaver Streets may be furnished with water for fire protection. I also wish to state at this time that during my inspections throughout the business sections there is a noticeable difference in the cleanliness in the rear of the buildings and complaints have been less frequent during the year. Several dumps have been cleaned and burned by the Department. I trust same will be kept free from rubbish in the future. There is no reason why vacant lots should be used for a dumping ground and if called to the attention of the Wardens they will do all in their power to remedy same. My attentions have been called to the fact about others, than the firemen riding on the Trucks going and coming from fires and wearing coats and boots

of the Department. I trust this will discontinue in the future. I wish to express my appreciation to the Mayor and City Council, and also the men of the Department for the splendid work they did during the year ending, 1931.

Respectfully submitted,

PAUL H. GUNTHER,

Chief.

REPORT OF THE HEALTH OFFICER

To the City Council of the City of Winooski:

The report of the City Health Officer for the year 1931 is respectfully submitted.

The past year was very satisfactory concerning the general health record of our city; with the exception of an epidemic of measles towards the end of the year, and a few cases of small pox.

The water supply is examined at regular intervals, and, as in previous years, is always found in excellent condition. There is a movement to extend the water supply to those parts of the city which have not as yet been provided for in that respect. The extension of the water supply would be another step towards the maintenance of good health in our community.

The garbage collecting system which was established last year, continues to be efficient, and with the co-operation of the people should prove to be a great convenience.

As a measure of health protection I recommend vaccination against small pox for all school children.

Following is a list of the contagious diseases contracted and reported during the past year.

Scarlet Fever	6	cases
Diphtheria	7	cases
Measles	. 60	cases
Whooping Cough	50	cases
Chicken pox	5	cases
Small pox	12	cases
Mumps	15	cases

Respectfully submitted,

J. G. Thabault, M. D.,

Health Officer.

REPORT OF THE VISITING NURSE

To the Honorable City Council of the City of Winooski:

Another year has passed for the Winooski Visiting Nurse. The routine is the same from year to year, the variation in the amount of bedside nursing work being the governing factor in the time the nurse has left for the educational part of Public Health Nursing. We do not regret at any time having a drop in the number of general nursing calls made, except as it has a bearing on the financial income; this year it is especially gratifying, as there has been so much general depression that the financial strain on a family has been great enough without that added burden. Our Maternity Nursing work for the year has shown a big increase over the previous year, December having been an especially busy month, with nearly twice as many calls as the average for the other eleven months of the year.

There were 178 births registered in 1931, an increase of 26 over 1930, and of this number, 136 or 76.3% of the total were carried by the association. Many of them were seen every week for a month or two, then every two weeks until they reached 15 pounds in weight, after which they were seen only once a month until they were one year of age. Sometimes it is necessary to see a baby oftener than that. There were 23 deaths among children under one year of age, 3 having been stillborn, and 15 of the remainder having died in the first month after birth, with 9 of that number "prematurity" was given as the cause of death. That is surely an indication that an added stress must be put upon our pre-natal work, attempting to get the patient earlier in her pregnancy and seeing her more often.

In the late Summer, Miss Dubuc, because of poor health, felt it necessary to resign. She has given long, faithful service to the Association and the City of Winooski. Miss Gertrude Langevin was transferred from the Lakside

section of Burlington to Winooski to take up the work.

The car is still giving excellent service—we wonder how we could get along without it. During December, when Miss Langevin was having her vacation, and there was so much work to be done, the Winooski car and the Burlington car were both necessary to cope with the situation. The upkeep of the Winooski car has been adequately taken care of by the Winooski Visiting Nurse Association, but not without considerable work and anxiety on their part. This Association was formed over a year ago for that purpose. The financing of the car has been accomplished in several ways. There is a subscription list-certain individuals guaranteeing to pay a stated sum, (May their number ever increase). A benefit picture was given one evening for which we extend our most sincere thanks to all connected with the "Strand." There were also four benefit card parties given. The Association is functioning normally although quietly.

We are still looking forward to the time when we can make our school inspections, as we feel that it is a muchneeded branch of Public Health Nursing.

We want to thank everyone who is helping our work in any way. With some it may be only a word of recommendation or encouragement. To the City Council, we give thanks for their co-operation in making the educational part of the work possible; otherwise we could do only the actual nursing work sanctioned by the Metropolitan and John Hancock Mutual Life Insurance Companies. It makes a satisfactory whole and helps us to strive to perfect our technique and advice given in many needed ways.

Respectfully submitted,

Helen M. Armstrong, R. N.,

Supervisor.

Visiting Nurse Association.

Burlington.

REPORT OF THE CIBRARY TRUSTEES

To the Honorable City Council of the City of Winooski:

In behalf of the Trustees of the Winooski Free Library, this twenty-fourth annual report is presented, with the receipts and expenditures on the opposite page. 19,741 books have been loaned from the Library to the people of this city during the past year, which is conclusive evidence that our citizens are being served by this institution.

In reviewing the work of the past year, there are no radical changes in policy or method to report except as follows; that several meetings of the Library Trustees will be held each year; that at a meeting of the Trustees on October 1st, Mrs. F. E. Robinson was elected Chairman, Miss Mary Allard, Secretary and George R. Stackpole, Treasurer and at a subsequent meeting on December 3rd, a motion was carried "that beginning January 1st, 1932, all books loaned from the Library and kept more than ten days, would entail a charge of two cents per day for each succeeding day and fines so imposed by the Librarian shall be used for the purchase of new books"; that the Treasurer subscribe for five magazines, which will be useful and interesting to the majority of our people who use the Library.

Deceased
September 21, 1931
JUDGE HENRY CONLIN
Over Twenty-three years Treasurer of
the Winooski Free Library

The United States Court, Vermont, this Community and our Library suffered a great loss in the passing of Judge Henry Conlin.

While the valued gift of money from the Ladies of the Progressive Study Club amounted to only a little over one-half that of the preceding year, yet it was the principal source of revenue for the purchase of new books, as the six hundred dollars appropriated by the City, each year, just about pays the rent, lights and the small salary of the Librarian. We recommend that the City increase the appropriation for the Library to eight hundred dollars annually.

We gratefully acknowledge, also, the gift of books and magazines from the following: Mrs. J. R. Isham, Paul Blanchard, Mrs. John Lyons, Leonard Cusson, Dorothy Vuley, Bertha St. Amour, John Bailey, Alice Pratt, Cornelius Leary, Mrs. F. E. Robinson, Antoinette Valley, Alison Osborne, Rev. E. Bowers, Cecilia Allard and Leona Germaine.

We thank the above mentioned and all, who have contributed in any way toward making the Winooski Free Library of greater benefit to the people of Winooski.

Respectfully submitted,

S. R. MARCOTTE,
MARIE REEVE ROBINSON,
MARY C. ALLARD,
GEORGE R. STACKPOLE,
Trustees.

Winooski, Vermont, January 29, 1932.

REPORT OF THE GENERAL FOREMAN OF THE WATER DEPARTMENT

To the Honorable City Council of the City of Winooski: Gentlemen:—

I, hereby, submit the following report as General Foreman of the Water Department.

The work in the past year consisted mostly of maintenance. The only construction done was replacing the one inch line on Shepard Street from Hall to Pine Street with a 6" cast iron main. The length of this main was 630 feet. All services on this street were renewed as far as the curb line.

One new hydrant was installed on this job on the south east corner of Shepard and Pine St. One 6" gate valve was also installed at the corner of Pine and Shepard St. The 6" main on Manseau St. was extended for a distance of 276 feet, south from Dion St. so as to take care of two new houses constructed on that street.

There were twelve new services constructed the past year and two services were renewed.

We had twenty-two calls to open and shut the water at the curb.

The reading of meters has been changed from every six weeks to quarterly readings. The maintenance of the meters was done by the man at the reservoir. There were seven frozen meters during the past year.

All hydrants have been painted during the past year. They were inspected at intervals throughout the winter months.

One hydrant was repaired at the corner of Follett and West Center St.

The total number of hydrants is eighty-eight; there are sixty-three public and twenty-five private hydrants. There are several old hydrants in the city that should be replaced. This could be done by the replacing of three or

four every year until all the hydrants are up to date.

There were six leaks in service lines. One service line was frozen; it was thawed out with hot water.

It was necessary to pump 2053 hours in the past year. We supplied Fort Ethan Allen with 4,589,375 gals. of water.

The Water Department bought $4\frac{1}{2}$ acres of land on the west side of the reservoir from Alfred Levesque in which the City may secure considerable gravel for street work. All the land has been fenced in.

Summary of Statistics for the Year Ending,
December 31, 1931
In the form recommended by the
New England Water Works Association
Winooski City Water Works
Winooski, Chittenden County, Vermont

GENERAL STATISTICS

Population by Census of 1930: 5,300.

Date of Construction: 1884.

By whom owned: City (Purchased July 1, 1905).

Mode of Supply: (Whether gravity or pumping): Gravity and pumping.

Source of Supply: Springs and Artesian Wells untreated.

Pumping Statistics

Builders of Pumping Machinery: Ingersoll Ranch Co. of N. E. Electricity purchased from the Green Mountain Power Corporation.

Total pumpage for the year: 65,048,060 gals. (approx.) Average head against which pump works: Pumps by air lift to reservoir.

REPORT OF GENERAL FOREMAN OF STREETS

To the Honorable City Council of the City of Winooski: Gentlemen:—

The following is the report of the General Foreman of Streets:

The Street Department, under the guidance of the City Council and the Street Commissioner, has kept the streets, walks, sewers and drains of the City in good condition and has completed many additional improvements. The following streets were scarified, reshaped, rolled, and then oiled.

Mayo St. from Malletts Bay Ave. to W. Canal St. Railroad St. from Malletts Bay Ave. to Weaver St. St. Peter St. from North St. to Malletts Bay Ave. North St. from Union St. to W. Spring St.

Other streets that had been oiled previous to this year were also given an application of road oil.

The maintenance of the macadam streets was done as usual during the past year. The amount completed was very small as the streets remained in good order during the summer and the fall months. All dirt streets were given an application of calcium chloride.

Hall Street was considerably widened from Audet St. to Shepard St. by cutting the bank on the north side. It was then surfaced with stone and gravel.

Hood Street from Bellevue Street to a point approximately 150 ft. south was covered with gravel. This was done so as to secure an outlet for Bellevue Street. There were two 15" tile culverts laid on Hood St.

Twenty-two feet of 16" galvanized culvert and two 45° bends were installed in Russell Street to take care of a bad water hole that existed there. The road was also widened at this point by filling with gravel.

Several walks throughout the city were covered with fine stone and dust. Various catch basins were lowered or raised and new outlets were put in two basins. There is a very noticeable lack of catch basins especially in the north east portion of the city. All sewers have been unplugged and flushed, when necessary. No sewers were constructed in the past year.

The only sidewalk construction was on the east side of North Street. Walk, curb and gutter were constructed from the new Memorial School to the corner of W. Spring St. This work was done by Pariseau and Bordeau, Contractors.

The gutters were cleaned during the Spring and Fall months. Those in the business section were cleaned at intervals when necessary. The catch basins were also cleansed in the Spring and Fall.

Considerable work was done repairing old, and building new guard rails. Work was carried on intermittently at the City Quarry during the year. A total of nine hundred and fifty-nine tons were quarried and crushed. The only snow removal work was done during the first months of the year.

The Street Department did considerable work for the Charity Department, which was charged to that department.

The following is a division of the operating cost of the Street Dept. for the year ended December 31, 1931:

OVERSEER'S REPORT

To the Tax Payers of the City of Winooski:

I hereby make my report as Overseer of the Poor. Since March 12 when I took my duty as Overseer I have taken care of 55 families. Up to December 1st also.

Due to the present condition of unemployment the City has been heavily pressed with demands for support.

With the careful supervision of the commissioner of charity we were able to solve the problem.

As you will see in my report every cent is accounted for; also itemized to the best of my ability.

We thank the present relief committee and the public for responding to our demands. Their work is greatly appreciated.

Very truly yours,

HENRY H. DEFORGE,

Overseer of the Poor.

P.S. This report is from March 12 to December 1, 1931.

We find there is due the City of Winooski from the State of Vermont \$868.21 for Road work, (Surface Treat-

ment, Resurfacing and Unselected Highways) which would have increased the assets of the Balance Sheet.

In conclusion we may state that the foregoing report is a correct and accurate check of the city treasurer's books and accounts.

George T. Graves,
Eugene H. Manseau,
Joseph L. Dufresne
Auditors.

February 4, 1932.

MAYOR'S MESSAGE

February 10, 1933

FELLOW CITIZENS:

This is the eleventh annual report of our City. All departments have done very well this year except the Charity Dept., and it is very evident from conditions that the large expenditures could not be helped. I recommend for next year that the Overseer of Charity have a lady assistant, so a better check on the Department may be had.

I wish to thank the efficient board of Aldermen I have had with me this past year, also all the Business people, the societies and the Individual Citizens, who have helped and cooperated with me in dealing with the heavy burden of Charity.

I hope that the same co-operation and help will be given to the next administration.

We are fortunate in having an income paying business, in our Water Department, to take care of the large amount of unemployment and I advise the continual outlay of the water department money to lay additional pipe lines.

We will be compelled to do this work someday and as it is necessary to pay money to our needy Citizens in this time of distress, this work can be done by this method of labor cheaper than at some later day.

On account of our large expense for Charity, we are this year left with a large amount of unpaid notes in the Bank, and before the next administration can properly do business it will be necessary to bond the City and pay these notes. I recommend a bond issue of \$60,000 to take up these notes and use the balance for Charity this next year.

I wish the interested ladies of our City would get together and re-organize our Visiting Nurses Association, add to it a Parent Teachers Department, and get this worthy cause to functioning again as it did when first started.

This indeed, has a prominent part in the Welfare of the Mothers and Children of our community.

Sincerely,

FRANK E. ROBINSON,

Mayor.

The property damage during the year 1932 amounts to \$11,870. Although the damage for the past year was considerable less than in 1931, the Department responded to more alarms than any other previous years on record. One of the reasons for the above may be due to the burning of more wood throughout the city and the financial conditions.

Several improvements have been made at a very small cost. An alarm Box has been placed at the corner of East Canal and Morgan Streets and another installed at the corner of Forrest and River Streets. Several dangerous lines, (iron wire) were removed from the top and replaced with covered wire below the High Voltage wires. I should like to recommend at this time, the removing and lowering of all the old iron wire, which remains and which has been in service for the past thirty years, and replacing this wire with covered wire, some time in the near future.

Back yards and alleys have been inspected and all

complaints have been adjusted, as soon as they were reported, this being done to the best of my ability.

The newly installed hydrants on the Upper Heights, Main Street and Weaver Street, have reduced the fire hazards in those locations to a great extent. These hydrants have been tested by the fire department and have proved very satisfactory.

I wish to take this opportunity of thanking the Honorable Mayor and City Council and all of the business men for their splendid cooperation. I also wish to thank the proprietor of the Fairview Garage who kindly donated the new Alarm Cards, and to thank the High School students and especially the boys of the Department for their splendid spirit, cooperation and integrity during the past year.

Respectfully submitted,

Paul H. Gunther, Chief.

REPORT OF THE HEALTH OFFICER

To the City Council of Winooski, Vermont:

The report of the City Health Officer for the year 1932 is respectfully submitted.

The past year was very satisfactory in regard to the health of the citizens of our city in general, there was no epidemic of any kind during the year which is very unusual.

Following is a list of the contagious diseases contracted and reported during the past year:

Diphtheria	12 cases
Scarlet Fever	11 cases
Mumps	21 cases
Chicken pox	16 cases
Measles	55 cases
Small pox	3 cases
Whooping cough	10 cases

The milk supply is furnished by accredited herds. All the dairies have been examined and are found modern and sanitary.

The water supply examined at the State Laboratory is found in excellent condition. Furthermore, the Water Department has extended its water system during the past year, thereby accommodating a large number of residents, who are grateful for this service.

Our Schools have been examined and are in good condition and well equipped for proper sanitation and comfort.

Respectfully submitted,

J. G. Thabault, M. D., Health Officer

REPORT OF THE VISITING NURSE

To the Honorable City Council of the City of Winooski:

The Winooski Visiting Nurse has just completed another very busy year. There is little change in a report such as ours as the routine remains the same from year to year. We did not have as many mothers and babies to whom we gave after-care as in 1931, for each year sees an increase in the number of patients going into hospitals for confinement. The epidemic of grippe and influenza did not pass Winooski by:—that was a factor in the increase of the number of general nursing calls. We also carried a few more chronic cases for the year.

There were 162 births in Winooski in 1932—a decrease of 16 from 1931. Of these 121 or 74.6% of the total were given care or advice by the Visiting Nurse. These babies were seen every week as long as necessary, then every other week until they weighed 15 pounds. After that, they were seen once a month until they reached their first birthday. Of all these births, only two were still-born, neither of them having been under our care. There were 13 deaths among babies under one year of age, a decrease of 10 from the previous year. Of this 13.5 were under the supervision of the Visiting Nurse. The death rate for Winooski is still rather high—81 deaths per 1000 living births. The death rate, however, for those under our care is 41 per 1000 living births.

There is still life in the car owned by the Winooski Visiting Nurse Association, though December 31, 1931 sees the car going into storage because of lack of funds for its upkeep. It is greatly to be regretted for if ever a car is needed it is during the winter months. It is because of the use to which we put the car that the work is kept up to the standard at which we aim.

In these days of depression, Miss Langevin has been

very glad to cooperate in any way possible with the various organizations giving material aid, and has found that help of much benefit both to the family and in her work.

We extend our sincere thanks to all who are in any way aiding us in our work. Were it not for the financial co-operation given by the City Council, we would find it impossible to carry on the much-needed educational work among our babies. That is the branch of our program that makes for the friendly feeling existing between family and nurse—she is not a stranger to them when she is called in to do the bedside nursing sanctioned by the Metropolitan and John Hancock Mutual Life Insurance Companies.

Respectfully submitted,

Helen M. Armstrong, R.N.

Director.

Visiting Nurse Association,
Burlington, Vermont.

REPORT OF THE LIBRARY TRUSTEES

We respectfully submit our twenty-fifth annual report as Trustees of the Winooski Free Library.

During this year of much unemployment the circulation of our Library has, indeed, shown what a necessity and help a Library is "be it ever so humble." The residents of Winooski have brought the circulation to 24,396 a very substantial gain over the past year.

Were it not for the support given us each year by the ladies of the Progressive Study Club, and to whom we are deeply indebted, our appropriation of \$600. would be inadequate to supply the needs of this ever growing service we are asked to give. The sum given by the Club this year was \$120.39.

Two hundred and sixty-one books were added this year, and fifty-five were loaned to us for three months from the State Book-Wagon, the only cost being the express to Montpelier.

We are grateful to Mrs. F. E. Robinson, Mrs. F. Sprout, Mrs. W. D. Daley, Miss A. Welch and Mrs. V. H. Peterson who on February 20th. thoroughly cleaned the shelves and books. Also to Miss Calvert, Miss Welch, Miss E. M. O'Brien, Miss H. O'Brien and Miss Fitzgerald who met with Mrs. Robinson in July and had a much needed Mending Bee.

On August 18th a card party was held at the home of Mrs. Robinson and \$12 was realized from this, for which we are very grateful.

We have also received books and magazines from the following: Burlington Building & Loan Association, Mrs. Wm. Hartigan, Antoinette Valley, Cecelia Allard, Mrs. F. E. Robinson, Elizabeth Adams, Mrs. R. D. Lewis,

Mrs. Henry Conlin, Mrs. Samuel D. Smith, Follette & Co., Mrs. A. B. Corey, Mrs. Harry Bailey, Miss A. Becwar, Erville Cameron, Mrs. F. E. Bigwood, Frank Lavallee, Katherine Adams, Mrs. John Lyons, Miss D. Calvert, Mrs. Evard Norris, Miss E. M. Packard, Mrs. H. Hurlbutt, and Mrs. H. A. Bailey. To these very good friends we extend our sincere thanks.

Respectfully submitted,

S. R. Marcotte,

Marie Reeve Robinson,
Chairman.

Mary C. Allard,
Secretary.

George R. Stackpole,
Treasurer.

Amelia V. Peterson,

Trustees.

Winooski, Vt., February 4, 1933.

REPORT OF THE SUPERINTENDENT OF THE WATER DEPARTMENT

To the Honorable Mayor and City Council:

GENTLEMEN:--

The following is the report of the Superintendent of the Water Department for the year ended December 31, 1932.

The Water Department completed the Construction of approximately 9,645 feet of new mains during the past year. The majority of this construction was on the Bond Issue program which appears as a separate item in this report.

New Water mains were laid as follows: In West Center Street from Mayo Street to Follett Street, 434 feet of 6" main which replaced a 1" supply pipe. Two services of 34" copper tubing were renewed as far as the houses, and three services renewed as far as the curbs. Four 6" valves were also installed on this street.

296 feet of new 6" main was laid in Niquette Court from the 10" main on LaFountain Street. This main replaced a 1" supply pipe. Eight services were renewed as far as the curb line and copper tubing was again used in the services. One 6" valve was installed.

The 4" main on North Street, leading from Hall Street to Pine Street was extended 96 feet. This was done in order to service two houses which previously were without water.

All of the old supply pipes, on streets where new mains were laid, were cut off and discontinued.

The following streets were connected to the High Pressure System: Franklin Street from Bellevue Street to a point fifty feet north of Hawthorne Street. 405 feet of 6" pipe was used on this job. This is a high service line which serves four houses. Three of these houses formerly had

very low pressure derived from a 1" gravity line, and one house was without water. One 6" valve was also installed. Two services were renewed as far as the curb. One service line was renewed as far as the cellar and a new service line was also installed. This 6" line does not connect to the Gravity System.

Connections were made to the High Pressure System on Weaver Street, from Stevens Street to West Spring Street. This was accomplished by installing a new 6" main from Stevens Street and connecting to the old 6" main at St. Peter Street. 332 feet of 2" wrought iron pipe was discontinued. The pressure on this street was very low and at different intervals no water was available in certain houses. Five services from Weaver Street to St. Peter Street were renewed with copper tubing as far as the curbs.

LaFountain Street from Main Street to Leclair Street was also connected to the High Pressure System by connecting the existing line in LaFountain Street to the High Pressure main on Main Street.

Sections of LaFountain and Weaver Streets were connected in such a way that they may be returned to the Gravity System by opening and closing certain valves.

Leclair Street from Burling Street to LaFountain Street was connected to the High Pressure System by the use of the existing supply line and closing the valve on LaFountain Street.

There were a total of five new services constructed during the past year excluding those put in under the Bond Issue. Four leaks in service lines the past year neccessitated the renewal of two of these lines. All service lines were renewed or constructed with 3/4" extra heavy copper tubing. This tubing is more practical as it will last longer than wrought iron pipe, and it saves considerable time laying, especially in trenches where rock is encountered. The total number of services renewed to house during the

past year were six. The total number renewed to curb were twenty.

The Department responded to 23 calls for opening and shutting water at the curb.

All of the meters were read quarterly during the year. Meters which had stopped, or meters found impossible to read were taken out and cleaned, repaired, painted and then tested. There were eleven frozen meters.

Hydrants were replaced on St. Peter Street near number 100, and at the corner of LaFountain and Franklin Streets during the past year. There are now a total of 95 hydrants, of which 70 are public and 25 private.

All hydrants were inspected at intervals during the year, and every two or three weeks in cold weather. The only new hydrants installed during the past year were in the Bond Issue.

Fort Ethan Allen was supplied with 5,727,750 gallons of water last year. It was necessary to pump the Artesian Wells 1,044 hours during the past year.

The lower reservoir was drained and cleaned during the early fall. This reservoir had not been cleaned for the past ten years. This work was accomplished by building plank runways and removing all material with wheelbarrows. This system was found to be more practical than using teams. The dirt was hauled away by truck and then wasted. An old stone wall, which had partly fallen down, was removed and replaced with a cement retaining wall 98 feet long. A cement pier was constructed to receive the suction line from the High Pressure Pump.

The woods at the reservoir property were cleaned of underbrush during the year. The work consisted of cutting all dead trees, underbrush and burning this brush. The majority of this work was done by men receiving aid from the City. The number of hours received from such labor is distributed as follows:

Maintenance of reservoirs, cutting brush, General repair, etc., 4,575 hours.

Construction of mains, services, etc., 1,363 hours.

REPORT OF THE BOND ISSUE PROGRAM

The following is a brief outline of the work accomplished on the \$20,000 Bond Issue Program.

The work started on April 4, and was completed on August 4. The work consisted of excavating, laying and backfilling of 8,220 feet of 6" cast iron main, installing thirty three new services and renewing thirteen services as far as the curb line. All of the services renewed had previously been connected to the gravity system. A total of twenty-two 6" valves were also installed. This does not include the installation of new valves on the hydrant branches. Seven new hydrants were also included in this installation. Considerable amount of rock excavation was necessary on Stevens Street and Upper Weaver Street. A "right of way" over private land, owned by Mrs. Omer Richard, was obtained for part of this distribution main. A new 25-horse power, 400 G. P. M. centrifugal pump used for supplying this system, was installed at the pump house. This pump operates approximately twenty times every twenty-four hours for about 1½ minutes. The suction line for the pump is so connected that either the upper or lower reservoirs may be used. This pump, which operates automatically, 3,000 gallon steel tank. connected to a range of pressure at the tank is from 60 to 80 lbs. A 4 inch meter to register all leaks and usage of water was installed on the discharge line from this tank. A total of 1,202,790 gallons of water was used from the time the meter was set (June 21) until January 1, 1933. A brick addition for housing this steel tank was constructed at the Pumping station. The following streets are connected to this High Pressure System:

Weaver Street: from West Spring northerly.

Stevens Street:

Main Street: from Stevens north to City limits.

Burling Street:

LaFountain Street: from Main to Leclair.

Leclair Street: from Burling to LaFountain Street. Franklin Street: from Hawthorne to George Street.

George Street: Bellevue Street:

There are now seventy three service connections on this High Pressure System. The total cost of this Bond Issue Construction, including labor and material will be found in the Auditor's Report.

Summary of Statistics
For the Year Ending December 31, 1932
In Form Recommended by the
New England Water Works Association

Winooski City Water Works, Winooski, Chittenden County, Vermont.

GENERAL STATISTICS

Population: by Census of 1930: 5300.

Date of Construction: 1884.

By whom owned: City. (Purchased July 1, 1905).

Mode of supply: (Whether gravity or pumping): Gravity

and pumping.

Source of Supply: Springs and Artesian Wells. (Untreated).

PUMPING STATISTICS

Builders of pumping machinery: Ingersoll-Rand Co. of N. E. Electricity purchased from the Green Mountain Power Corporation.

Total pumpage for the year: (air lift) 31,762,656 gals.

Total pumpage for the year: (High Pressure System) 1,202,790 gals.

Average head against which pump works: Pumps by air lift to reservoir.

Average head against which pump works: (High Pressure System) 70 lbs.

STATISTICS OF CONSUMPTION OF WATE	R
Estimated population at date	5,200
Estimated population on lines of pipe	5,150
Estimated population supplied	5,150
Total consumption for year Gravity system (gals)	98,500,000
Total consumption for year High Pressure system	
(metered) (gals.)	1,202,790
Average daily consumption (gals.)	272,412
Gallons per day to each inhabitant (est.)	52.3
Gallons per day to each consumer (est.)	52.1
Gallons per day to each tap	302.3

STATISTICS RELATING TO DISTRIBUTION SYSTEM

Kind of pipe: Cast Iron, wrought iron.

Sizes: From 4" to 10".

Extended during the year: 7,448 feet.

Discontinued: 0.

Total now in use: 12.02 miles (est.).

Length of pipe less than 4" diameter: 2.34 miles (est.).

Number of hydrants added during the year: 7.

Number of hydrants (public and private) now in use: 95.

Number of stop gates added during the year: 33.

Number of stop gates now in use: 177.

Number of stop gates smaller than 4" added during the year: 0.

Number of stop gates smaller than 4'': 17.

Number of blow offs: 1.

Range of pressure on mains: 9 to 90 lbs.

Kind of pipe: Wrought iron, Steel, Copper tubing.

Sizes: $\frac{1}{2}$ " to 6". Extended: 1,184 feet.

Total now in use: 5.57 miles (estimated).

Number of service taps added during the year: 38, discon-

tinued: 1.

Number now in use: 901.

Average length of service: 32 feet (estimated).

Number of meters added: 37. Number now in use: 902.

Percentage of services metered: 99%.

Number of meters and elevators added: 0, discontinued: 0.

Number now in use: 0.

Respectfully submitted,

JAS. SULLIVAN,
Superintendent of Water Depart.

REPORT OF THE SUPERINTENDENT OF THE STREET DEPARTMENT

To the Honorable Mayor and City Council:

GENTLEMEN:

I hereby, submit my report as Superintendent of the Street Department, for the year ended December 31, 1932, as follows:

The majority of the work undertaken in the past year, by the Street Department, was maintenance. There were a few exceptions however, which are included in this report. Construction is the most important exception.

The only permanent Construction undertaken this year was the laying of a 7" reinforced Cement Pavement on Main Street, from the Central Vermont Railway overpass to the South Property line of Maple and Mansion Streets. The work consisted of excavating and removing the surplus material, removing the old street car rails and ties and grading. All local labor was used on this construction. The surplus material, which was in condition to warrant its use, was hauled to different streets and put to good use in grading. The waste material was used to a profitable advantage filling in shoulders and widening roads. I believe it worthy and advisable to carry on this kind of Construction each year, as the State appropriates a certain amount of money each year, for this type of Construction. The results derived are highly favorable, both for our City Citizens and for tourists from other States. The total cost of the above Construction was \$2,661.80 of which the State paid \$1,817.06.

160 feet of roadway on Platt Street, from Barlow Street to a point west, was excavated to an approximate depth of 20 inches. The waste material consisted largely of clay. This clay was hauled away and wasted. The base constructed on this Street was of rubble stone about

12 inches deep. The largest portion of this rubble stone was derived from the Water Bond Issue on Weaver Street and Stevens Street. This base was then covered with fine stone and gravel and later it was rolled. The total cost of the work on Platt Street, including labor, material and tools was \$642.99. The City will receive this amount from State Aid Funds.

The Street Department purchased only 10,000 gallons of Special No. 6 Asphaltic Road Oil this year. This meant that streets which were in very bad need of this treatment were all that were treated. Parts of Main and St. Peter Streets were scarified and rolled before treating with this oil.

The maintenance of macadam roads was continued as usual during the past year. Calcium Chloride was applied to all dirt streets throughout the City.

The shoulders on the Cement road from Hood's Crossing to the City Line on East Allen Street were repaired during the past fall. This work consisted of excavating and removing the old dirt shoulders and installing a crushed stone base 3 inches thick, rolling and then a Bitumel's H. X. treatment applied. This was applied by means of a hand pump. A portion of the cost of this work will be paid for by the State.

All of the streets and walks were plowed when necessary. They were also plowed during and after a snow storm. All snow was removed from the Business Section and other localities when occasion required. The streets and walks were sanded when needed. Sand containers were placed at various locations throughout the City during the past winter. These containers were inspected regularly and filled with dry sand when necessary.

All Sewers have been unplugged and flushed when needed. 116 feet of 8 inch Sewer on Audet Street was excavated, and relaid to grade. This Sewer was then extended by laying 204 feet of 8 inch tile and 56 feet of 6

inch tile. Two man holes were also constructed on this street. 134 feet of 6 inch sewer was constructed on West Allen Street from Morgan's Lane, to the end of the street. One man hole was also constructed on this job.

A tile drain was removed from the cellar of Mrs. K. Murphey's residence on West Spring Street. This drain was causing considerable trouble, so it seemed advisable to change the location of this drain to the outside of the house. The material required for this job was 64 feet of 15 inch tile.

A drain located below Hood's Crossing on East Allen Street became plugged by reason of dumping refuse and waste material over the out-let end. This drain was excavated and extended 30 feet further. 15 inch tile was used in this extension.

A drain between Platt Street and East Spring Street was thoroughly cleaned. This drain is partly tiled, the tiling running from Main Street to the rear of the residence of Jules Mongeon on Platt Street. The remainder of this is an open brook, which runs from the Mongeon residence to the Porter Screen Company reservoir. This brook was in poor condition and overflowed frequently after heavy rains. The results from this overflow were such that the water would run over adjoining property, causing this property to become flooded.

The gutters in the Business section were thoroughly cleaned when necessary. All of the remaining gutters in the City were cleaned in the Spring and Fall. They were also cleaned at other intervals when they were in need of it.

All catch basins were cleaned in the Spring and Fall of the year, and at other intervals when their condition warranted it. Three catch basin outlets were excavated and renewed with larger outlets. There were not any new catch basins constructed during the past year.

All dirt Streets were graded with the Motor Grader when their condition became necessary. Several streets

on which the grader could not be used to advantage, were scarified, reshaped and then rolled.

Many of the City walks were benefited by raising them with sand and gravel. This material was obtained from the sand pit at the City Reservoir. The sand and gravel was then covered with pea stone and dust, this being obtained from our City Quarry.

Work was carried on at intervals, during the past year, at the City Quarry. A total tonnage of 2,146 was quarried and crushed. A considerable amount of this stone was purchased by outside parties. The Quarry Tool Shed was replaced with a new shed. This new shed adds to the general appearance and convenience at the Quarry and it is more suitably located than the old shed. The old shed was in very poor condition so it was necessary to construct a new one.

Several trees throughout the city were taken down. These trees were dangerous and a menace to adjoining property. The stumps of these trees were also taken out and hauled away. Other trees throughout the city were trimmed of overhanging branches and low limbs.

A considerable amount of work was done for the Charity Department, such as moving, hauling wood etc.

During the last six months of the year the majority of the work accomplished by the Street Department was done by men receiving aid from the City.

DISTRIBUTION	OF	LABOR	IHUS	RECEIVED
General Repair				4,659 hrs.
Quarry				3.021 hrs.

Respectfully submitted,

JAMES SULLIVAN,
Superintendent of Streets.

OVERSEER'S REPORT

To the Tax Payers of the City of Winooski:

I hereby submit my report as Overseer of the Poor. Since March 12th when I took my duty as Overseer, I have taken care of 210 families. Up to December 1st also. Due to the present condition of unemployment the City has been heavily pressed with great demands for support. With the careful supervision of the Commissioner of Charity we were able to solve the problem.

As you will see in my report every cent is accounted for, also itemized to the best of my ability.

We thank the present relief committee and the Public for responding to our demands. Their work is greatly appreciated.

Very truly yours,

Henry H. DeForge, Overseer of the Poor.

N3X61113 /X

We find that there is due the City of Winooski, \$2,849.70 for road work, surface treatment, resurfacing and unselected highways which would have increased the assets of the Balance Sheet.

In conclusion we may state that the foregoing report is a correct and accurate check of the City Treasurer's books and accounts.

George T. Graves,
Eugene H. Manseau,
Joseph L. Dufresne,
Auditors.

February 6, 1933.
